SUMMARY

Full Stack Developer specialized in Java and JavaScript/TypeScript, with solid experience in developing complete web applications, featuring dynamic interfaces integrated with robust and scalable REST APIs, along with relational and NoSQL databases. Extensive knowledge of back-end frameworks such as Spring Boot, Node.js, and .NET, with an emphasis on Spring Security (JWT), Hibernate, and Spring Data JPA. Skilled in front-end development using Next.js, Angular, and AngularJS, coupled with Tailwind CSS and Bootstrap to build modern and responsive interfaces as well as notions of messaging systems (RabbitMQ, Apache Kafka) and experience in documentation using OpenAPI and Swagger. Seeking a position where I can apply and expand my skills, contributing with my experience in developing robust, scalable, and efficient solutions.

EDUCATION

Centro Universitário União das Américas Descomplica – Uniamérica   January 2023 – December 2026

Bachelor's Degree in Computer Science

- Problem Solving with Integrals, Applied Statistics, Analytical Geometry, and Linear Algebra.
- Object-Oriented Programming, Data Structures, Databases, BI and Big Data, Machine Learning.
- Web Development, Mobile Development, Networks and Cloud.

Centro Federal de Educação Tecnológica de Minas Gerais – CEFET-MG   February 2018 – March 2021

Technical Degree in Electro-electronics

- Boolean Algebra and Digital Electronics.
- Arduino and microcontroller programming with C and C++.
- Networks and Industrial Computing, Control and Automation of Industrial Processes.

SKILLS

Languages: Java, JavaScript, TypeScript, C#, Python, SQL, C, C++, Shell

Front-end: Next.Js, React, AngularJS, Angular, Tailwind CSS, Bootstrap

Back-end: Spring Boot, Spring Data JPA, Spring Webflux, Hibernate, Node.Js, Prisma, .NET

Databases: MySQL, PostgreSQL, Oracle, SQLite, H2, MongoDB, Redis

Mobile: Ionic/Angular, React Native

DevOps/Cloud: Docker, Git, GitHub, Maven, Gradle, AWS (EC2, Lambda, S3, EFS, RDS, DynamoDB, VPC)

Messaging: RabbitMQ, Apache Kafka

Tools: JUnit, Mockito, Flyway, Liquibase, Linux

EXPERIENCE

Software Development Intern   August 2023 – Present

Empresa 1 – Belo Horizonte, MG (Remote)

- Collaborated on the migration of a legacy C++ application to web using Spring Framework and AngularJS.
- Designed and optimized SQL database queries for relational databases, reducing response time by 30%.
- Designed and implemented REST APIs with Spring and Hibernate, efficiently integrating internal systems.
- Automated builds with Maven and managed database migrations with Liquibase, ensuring consistent CI/CD.
- Worked in agile squads (Scrum), contributing to sprints, backlog refinement, and daily meetings for iterative, demand-driven deliveries.

Tags: Java, JavaScript, AngularJS, Spring Framework, Hibernate, Oracle, SQL, Wildfly, Agile, Scrum, C++

Systems Development Analyst   June 2022 – January 2023

ACT Digital – Betim, MG

- Developed an in-house Excel system for product management and process optimization.
- Managed products and testing tools in the NVH area, implementing traceability processes.
- Approved calibration charts for NVH testing equipment, ensuring compliance with Stellantis engineering standards.

Tags: Excel, VBA, Macro, Management, Electronics

LANGUAGES

- Advanced English (B2 Upper EFSET, C2 Reading – C1 Writing)
- Native Portuguese

RELEVANT CERTIFICATES

Stellantis Education Award; AWS Academy Cloud Architecting; AWS Academy Cloud Foundations; Oracle Next Education F2 T4 Back-end; Python, Data Science on OCI and Oracle Analytics Training; EF SET English Certificate (B2 Upper Intermediate); Java Foundations; ChatGPT Prompt Engineering for Developers

PROJECTS

1 – Medical Clinic API
Overview: REST API for managing a medical clinic, developed with Spring Boot and MySQL.
Technologies: Java, Spring Boot 3, Spring Data JPA, Hibernate, MySQL, Flyway, Lombok, JUnit, Mockito, Swagger, JWT
Repository: https://github.com/Ranieeery/medical-clinic-api-with-spring

2 – E-commerce Chatbot
Overview: A Spring Boot application that implements a customer service chatbot.
Technologies: Java, Spring Boot, Spring Webflux, Thymeleaf, JavaScript, jQuery, OpenAI API, Artificial Intelligence
Repository: https://github.com/Ranieeery/ecommerce-chatbot

3 – E-commerce Product Recommendation System
Overview: AI recommendation system based on customer reviews.
Technologies: Java, Maven, OpenAI API, Inteligência Artificial
Repository: https://github.com/Ranieeery/openai-ecommerce-api-integration

4 – Find-ZIP Code
Overview: REST API for querying zip codes from a csv file.
Technologies: Java, Spring Boot 3, Spring Data JPA, Hibernate, MySQL, Flyway, JUnit, Swagger
Repository: https://github.com/Ranieeery/Busca-CEP

5 – Sales MVC
Overview: Full Stack application in C# and ASP.NET to manage sales records, sellers, and departments.
Technologies: C#, ASP.NET Core MVC, Entity Framework, MySQL, JavaScript, Migrations, LINQ
Repository: https://github.com/Ranieeery/VendasMVC

6 – Habits Tracker
Overview: Full Stack application for monitoring and maintaining daily habits, available for web and mobile.
Technologies: Node.js, Fastify, Prisma, SQLite, Swagger, React, Vite, Tailwind CSS, Axios, React Native, Expo
Repository: https://github.com/Ranieeery/Habits-tracker

7 – Personal Portfolio
Overview: Portfolio website where I list my professional experiences and personal projects.
Technologies: Next.Js, TypeScript, React, Swiper, CSS, Vercel, Node.Js, ESLint, Prettier
Repository: https://www.raniery.dev/
